PROFESSIONAL SUMMARY

Results driven Web Developer with 5+ years of experience building high performance, scalable websites and web applications. Skilled in writing clean, maintainable code and creating intuitive, responsive user interfaces. Proven track record in optimizing web performance, streamlining workflows and delivering efficient, future ready solutions that enhance user experience and support business growth.

WORK EXPERIENCE

Web Developer

G&G Innovations Information Technology, LLC

Aug 2022 - Present

Dubai, United Arab Emirates

- Develop and maintain front-end features for multiple in-house and client web applications using React.js, Next.js, TypeScript, Redux, Context API and JavaScript (ES6+).
- Build responsive, high-performance user interfaces with Tailwind CSS, Bootstrap, SASS/SCSS and Ant Design, ensuring pixel-perfect accuracy and cross-browser compatibility.
- Develop and integrate RESTful APIs using Node.js and PHP Laravel, ensuring secure, scalable and high-performance web applications.
- Customize and manage WordPress and Webflow CMS platforms for dynamic content, SEO optimization and seamless UI integration.
- Conduct testing, debugging and code optimization, manage Git/GitHub version control and improve deployment reliability with Cloudflare.
- Collaborate in Agile environments to streamline workflows, enhance performance and deliver timely, high-quality solutions.

Full Stack Developer

Avodha Edutech Private Limited

Mar 2021 - Feb 2022

Kochi, India

- Developed and maintained full-stack web applications using JavaScript, React JS, PHP (Laravel) and Python.
- Designed and implemented RESTful APIs to enable seamless front-end and back-end communication.
- Built responsive UIs with Bootstrap, ensuring performance and cross-browser compatibility.
- Handled testing, debugging and Git-based version control for reliable deployments.

Data Analyst & Business Intelligence Analyst

Joseph Sriharsha and Mary Indraj Educational Society (NASSCOM)

Feb 2022 - July 2022

Hyderabad, India

- Gathering data from multiple sources, both internal and external to the organization.
- Organizing and preparing data for analysis by removing inconsistencies, handling missing values and transforming data into a suitable format.
- Applying statistical techniques and data visualization to explore patterns, trends and relationships in the data.
- Using tools like SQL, Excel, Python, R or business intelligence platforms Tableau to extract, manipulate and analyze data.

SKILLS

React.js Next.js JavaScript (ES6+)
TypeScript Context API RESTful API
Redux Toolkit Ant Design WordPress
Webflow SASS/SCSS Tailwind CSS
Bootstrap HTML5 CSS3 Node.js
PHP Laravel Python CI/CD Pipelines
Agile UI/UX Development Unit Testing
Project Documentation Code review

EDUCATION

Master of Computer Applications

APJ Abdul Kalam Technological University

2019 - 2021

Bachelor of Computer Applications

Calicut University

2016 - 2019

Higher Secondary (Science)

G.H.S.S Kattilangadi

2014 - 2016

SSLC Examination

KHMHSS Alathiyur

2013 - 2014

TOOLS & PLATFORMS

Visual-Studio Code | Eclipse | Git |

Webflow | WordPress | Postman |

Xampp | MySQL | PyCharm | Slack |

Tableau | Jupyter | Microsoft 365 |

AWS | Cloudflare | Figma | cPanel |

Notepad | Photoshop | Vercel | Jira |

Netlify | MongoDB | Canva |

LANGUAGES

English, Hindi, Arabic, Malayalam

PROJECTS

Real Estate & Rental Homes Platform

Next.js, React.js, TypeScript, Tailwind CSS, RESTful APIs

- Built responsive property websites with search, SEO, dynamic listings and an admin panel for managing properties.

E-commerce Platforms

React.js, Next.js, Node.js, Context API, SCSS, Ant Design

- Developed multi-category e-commerce stores with filters, cart, secure checkout, admin panel and optimized API integration.

Innovations Company Website

Next.js, React.js, Tailwind CSS, Webflow, WordPress

- Developed responsive company websites with optimized front-end, API integration and easy CMS management using WordPress/Webflow.

Matrimony Web & App

Next.js, React.js, TypeScript, Node.js, SASS, Ant Design

- Developed multi category e-commerce front-end with optimized performance and APIs.

Metaverse & Blockchain Websites

Next.js, React.js, TypeScript, Bootstrap, Web3.js

- Built decentralized platforms and metaverse websites with blockchain integration, NFT support and responsive front end interfaces.

Sentiment Analysis (NLP on Twitter Data)

Python, MySQL

- Analyzed Twitter data using NLP with Bag of Words and TF and IDF to classify tweet sentiments.

Fast Billing Using IoT & Library Management

Android, ASP.NET, PHP, MySQL

- Developed IoT-based billing and library management solutions for automating supermarket checkout and book record transactions.

ACHIEVEMENTS

- Successfully delivered 50+ client projects on time with high client satisfaction.
- Enhanced UI performance and responsiveness, delivering a smoother and faster user experience.
- Automated CI/CD pipelines using GitHub Actions, boosting deployment efficiency and reliability.
- Collaborated with cross-functional teams to develop scalable, high-performance web applications aligned with business goals.
- Optimized code and workflows, reducing application load times and improving maintainability.
- Implemented performance optimizations and best practices, improving application efficiency and maintainability.

PERSONAL STRENGTHS

- Strong analytical and problem-solving skills with a focus on efficient solutions.
- Excellent communication and collaboration abilities in cross functional teams.
- Detail oriented and committed to writing clean, maintainable code.
- Fast learner with a passion for exploring and adopting new technologies.
- Skilled at managing multiple projects and meeting tight deadlines.
